

- **dokit<sup>™</sup>** is a system consisting of a portable wall unit that houses support materials as well as a stainless steel platform designed to display magnetic pictograms.
- Medisign Inc. is authorized through a 2010 licensing agreement with SAHO (Saskatchewan Association of Health Organizations) to reproduce and distribute TLR<sup>®</sup> program logos.
- Our system facilitates the display of multiple pictograms simultaneously beside each bed in each and every room.

**This could be your company name or logo**

- A binder is provided with each system which houses and catalogues the pictograms not currently in use.
- In addition to the TLR<sup>®</sup> Logos we have an extensive library to choose from to assist health care workers in their communication efforts with each other, clients, volunteers, families and visitors.
- ***The platform can be custom engraved with any logo, company, organization or family name of your choice.***
